Education

IILM University, Greater Noida **2023 - 2027**
B.Tech in Computer Science and Engineering **CGPA: 7.89/10**

Achievements

- Published Patent Application, Indian Patent Office (Application No. 202611071187): *Wearable Head-Mounted Device for Continuous Mental State Monitoring and Adaptive Cognitive Regulation* **10 Aug 2026**
- Research article accepted in **IEEE Transactions on Medical Robotics and Bionics (T-MRB)**: *SHAP-based Study: XAI-Guided Optimisation of Spatial-Temporal Bio-Neuro Marker EEG for Depression* **19 Jul 2026**
- Research Paper accepted at **IEEE Sponsored ETNCC 2026**: *INORA: A Low-Cost 3-Channel EEG Acquisition System with Driven-Right-Leg Noise Suppression for BCI Prototyping* **31 May 2026**
- Research Paper accepted at **ICICCC-2026**: *Low-Cost Three-Channel EEG-Based Mental Fatigue Detection Using Machine Learning* **25 Aug 2026**
- **Hackathon Winner (1st Rank)** among 1,004 participants across 118 teams **02 Apr 2026**
- Secured **1st Place in the Call for Paper event** at SRM Institute of Science and Technology **17 Sep 2025**

Technical Skills

Programming Languages: Java, Python, TypeScript, JavaScript, SQL
Frontend: Next.js, React.js, Tailwind CSS, HTML
Backend: Node.js, Express.js, Django, FastAPI, REST APIs, JWT Authentication, OAuth
Databases: MySQL, PostgreSQL, Supabase
Core Computer Science: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks
Tools & Platforms: Git, GitHub, AWS, Postman, VS Code, Chrome Extension Development

Projects

INORA - Multi-Channel EEG-Based Control **Dec 2025 - Jan 2026**
Technologies: AD620, TL072, ADS1115, ESP32, Python, NumPy

- Built a low-cost **3-channel EEG acquisition system** with wireless streaming at **83 Hz/channel**, and developed a Python pipeline for EEG acquisition, filtering, and DRL-based noise reduction, validated on **20 volunteers**.
- Demonstrated EEG-based Pong control with valid **15–80 uV signals** using hardware costing **INR 3,146**.

I Hate Form - AI-Powered Job Application Assistant **Aug 2026 - Present**
Technologies: Next.js, TypeScript, Chrome MV3, PostgreSQL, Prisma, Nvidia API(NIM)

- Built a Chrome extension for intelligent job-form autofill using stored profiles, with rule-first + AI fallback, confidence scoring, dynamic forms, iframes, Shadow DOM, and manual review.
- Added AI job analysis, resume matching, and answer generation with data minimization, prompt-injection protection, and secure authentication.

RazorRecover AI - AI Revenue Recovery Agent Live Demo **July 2026 - Present**
Technologies: Next.js, TypeScript, FastAPI, PostgreSQL, Redis, Celery, Razorpay API, Nvidia API (NIM).

- Built an AI platform analyzing failed Razorpay transactions and recommending recovery strategies using customer history.
- Engineered event-driven recovery with policy checks and human approval, plus a dashboard for transactions, AI decisions, outcomes, and audit history.

Experience

Frontend React Developer - Intern **Dec 2025 - Feb 2026**
Kasper Infotech Pvt. Ltd. *Remote*

- Developed and improved responsive web pages using **React.js**, built reusable UI components, and enhanced interface structure, usability, and responsiveness.
- Resolved UI and frontend bugs while maintaining technical documentation and project updates.

Machine Learning & Data Science Intern **May 2025 - Jul 2025**
Svaarogyam Medical Devices Pvt. Ltd. *Remote*

- Worked on healthcare machine learning tasks involving **data cleaning, preprocessing, feature extraction**, and predictive modeling for medical device applications.
- Built end-to-end **ML pipelines** collaboratively with a remote team to deliver project milestones in the medical domain.
